Mansehra, Pakistan

Profile Summary

First-semester Software Engineering student with a keen interest in software development and modern technologies. Familiar with basic programming concepts and computer operations. Actively learning and building skills in coding, logical thinking, and teamwork, with a strong desire to grow as a professional software engineer.

Professional Skill

- Problem solving & logical thinking
- Communication skills
- Willingness to learn
- Team Work

Relevant Skill

- Programming Fundamentals
- MS Office
- C / C++ / Java
- HTML & CSS

Education

Bachelor of Software Engineering (Four - year Program)

Currently enrolled in 1st semester

Studying fundamentals of programming and computer science

Learning problem-solving, logic building, and software development basics

Work Experience

Training

- Currently learning programming fundamentals and software engineering concepts
- Practicing basic problem-solving and logical thinking through coursework
- Gaining hands-on experience with basic coding exercises and assignments

Academic projects

- Completed small programming exercises as part of coursework
- Worked on basic problem-solving tasks using programming concepts
- Participated in group assignments and presentations

Interest

- Programming and software development
- Freelancing and online work
- Learning new technologies
